

ALIA DINIS

Software Engineer

+244 947 514 270

aliadinis18@gmail.com

Luanda, Angola

PROFILE

Self-taught Software Engineering student with strong proficiency in solving complex problems. Hands-on experience in low-level UNIX systems development, DevOps and modern web application architecture. Results-oriented, autonomous and with a strong learning capacity in collaborative and practical environments.

EDUCATION

42 Luanda – Common Core

2024 – Present

Intensive Software Engineering training with a methodology based on collaborative learning and practical project development.

Skills developed:

- Application development in C and C++ with imperative and object-oriented paradigms
- Unix systems programming, including processes, signals, pipes and communication via TCP/UDP sockets
- Linux system administration and use of Docker for virtualization and development environments
- Implementation of algorithms, data structures and computational graphics concepts
- Knowledge of computer networks, TCP/IP protocols, DNS, subnets and servers

42 Luanda – Piscine

2023

Immersive 30-day programming bootcamp with a strong focus on algorithmic problem-solving under continuous pressure and proficiency in UNIX environments.

Instituto Politécnico Privado do Sequele

2020 – 2024

Finance Technician.

FEATURED PROJECTS

- Transcendence – Jiu-Jitsu E-commerce (Full Stack) 2026
Modern e-commerce platform for selling Brazilian Jiu-Jitsu equipment, with secure authentication, user management, multilingual support and an admin panel.
- Inception (DevOps / Systems Administration) 2026
Microservices-based infrastructure using Docker Compose, including NGINX with SSL/TLS, WordPress, MariaDB and secure volume and network management on Linux.
- ft_irc (Network Programming) 2026
IRC server compatible with real clients, built with TCP/IP sockets, I/O multiplexing and object-oriented programming in C++98.
- cub3D (Graphics Programming) 2025

Graphics engine inspired by Wolfenstein 3D using ray-casting, trigonometry and graphical rendering in C.

- Minishell (C / Unix Systems)

2025

UNIX shell in C with support for pipes, redirections, environment variables and process management. Full implementation with synchronous system signal handling.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript
- **Frontend:** React, Next.js, HTML, CSS, Tailwind CSS
- **Backend & APIs:** REST APIs, JWT, OAuth 2.0
- **Databases:** PostgreSQL, MariaDB
- **DevOps & Systems:** Linux/Unix, Docker, Docker Compose, NGINX, Git/GitHub
- **Networking:** TCP/IP, DNS, Subnets, Server Administration

LANGUAGES

- Portuguese: Native
- English: Fluent
